

MediMitra

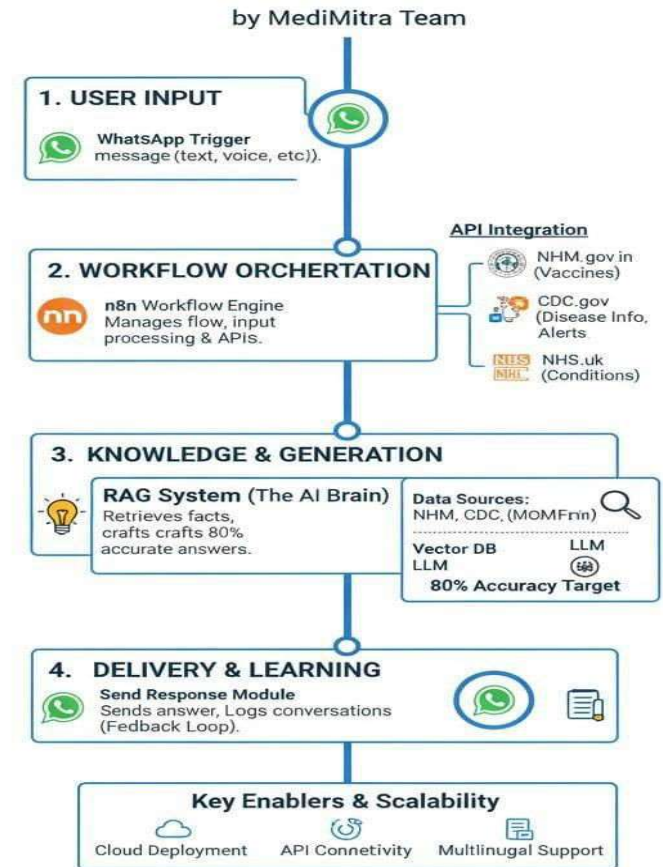

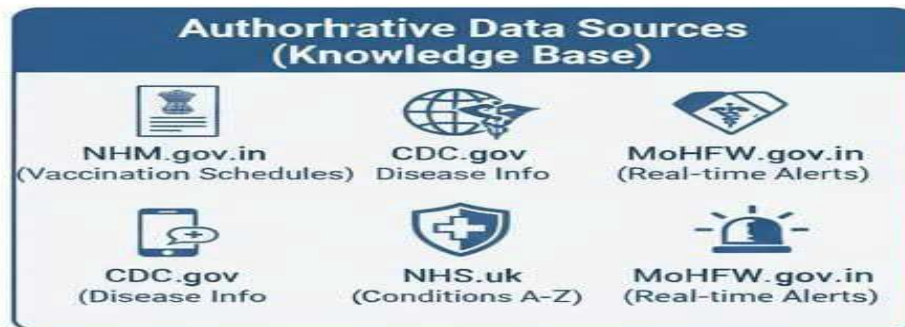

IDEA TITLE

TECHNICAL APPROACH

- **Framework:** n8n workflows (main logic)
- **AI Engine:** Google Gemini for query understanding + answers
- **Messaging:** WhatsApp Business API (Twilio / Gupshup)
- **Backend:** Minimal; optional Flask / Node.js microservice
- **APIs:** MoHFW, CDC, WHO via n8n HTTP nodes
- **Database:** MongoDB, Vector Data & Google Sheets(FAQs, logs, multilingual data)
- **Languages:** Multilingual like Hindi, English, regional (with auto-translation)

IMPACT AND BENEFITS

Potential Impact

Instant Health Support via WhatsApp/SMS, overcoming location and tech barriers.

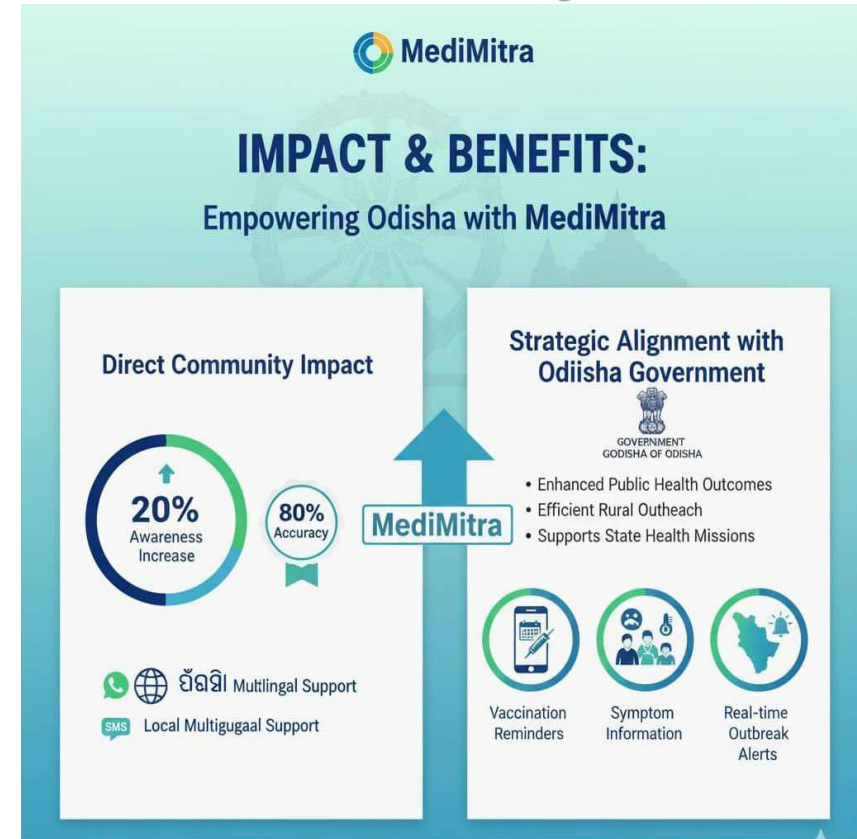

Improves Outcomes through early intervention, especially in rural areas.

Benefits

Social: Boosts public health awareness with verified, preventive advice.

Economic: Cuts costs by reducing unnecessary clinic visits.

Environmental: Lowers travel needs, reducing carbon footprint.
