Summary

Final-year Information Technology undergraduate specializing in full-stack web development and applied machine learning. Built and deployed production software including a farm-to-market marketplace with ARIMA-based price forecasting and a multilingual AI healthcare chatbot. Skilled in React, Node.js, Python, REST APIs, and cloud deployment (AWS, GCP, Vercel), with hands-on Agile experience.

Education

Shree L. R. Tiwari College of Engineering, University of Mumbai

Bachelor of Technology in Information Technology

Expected Graduation: June 2027

Mumbai, India

Experience

CodSoft

Dec 2025 – Jan 2026

Web Development Intern

Mumbai, India

- Built and deployed responsive web applications using HTML, CSS, and JavaScript.
- Implemented interactive UI components, including calculators and landing pages.
- Managed version control and deployment workflows using Git and GitHub Pages.

Compozent

Dec 2024 – Jan 2025

Software Development Engineer (Web) Intern

Mumbai, India

- Developed and enhanced production-level features using React and Node.js within an Agile development environment.
- Debugged, refactored, and optimized existing code to improve readability, performance, and maintainability.
- Collaborated with cross-functional teams using Git-based workflows, sprint planning, and code reviews.

Projects

KrishiSaathi – Farm-to-Market Marketplace Platform

Jul 2025 – May 2026

React, Node.js, Firebase, MongoDB, Python (ARIMA), Razorpay, Vercel

- Built a full-stack marketplace platform connecting farmers directly with buyers, eliminating agricultural middlemen for 18,300+ commodity price records.
- Developed an ARIMA-based machine learning model trained on AGMARKNET government mandi price data to forecast commodity prices.
- Engineered a hybrid Firestore and MongoDB persistence architecture with real-time cart synchronization and role-based farmer and buyer dashboards.
- Integrated Google, Facebook, and Apple OAuth authentication with Razorpay payments, 8-language commodity search, and reduced production bundle size by 69 percent (2.9MB to 900KB) via code splitting.
- Filed for copyright registration of the software with the Indian Copyright Office (Diary No. SW-21662/2026-CO), currently in re-scrutiny.

MedTalk – AI Healthcare Chatbot

Jan 2025 – May 2025

Python, Flask, Google Gemini API, Google Cloud

- Developed a 24/7 multilingual AI chatbot using the Google Gemini API with voice-based interaction via Google Cloud Speech-to-Text and Text-to-Speech APIs.
- Designed and deployed a secure Flask backend with RESTful API architecture for accurate, preliminary healthcare guidance.

Skills

Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks and Libraries: React.js, Next.js, Node.js, Express.js, Flask

Databases: MongoDB, Firebase Firestore

Cloud and Deployment: AWS, Google Cloud Platform (GCP), Vercel, Docker

Tools: Git, GitHub, REST APIs, Postman

Machine Learning and Data: Machine Learning, ARIMA Forecasting, Data Visualization, Data Transformation

Methodologies: Agile, Scrum
