SUMMARY

Final-year Information Technology undergraduate specializing in full-stack web development and applied machine learning. Built and deployed production software including a farm-to-market marketplace with ARIMA-based price forecasting and a multilingual AI healthcare chatbot. Skilled in React, Next.js, Node.js, Python, REST APIs, and cloud deployment (AWS, GCP, Vercel), with hands-on Agile experience.

EXPERIENCE

Software Development Engineer (Web) Intern

Dec '24 — Jan '25

Compozent

Mumbai, India

- Developed and enhanced production-level features using React and Node.js within an Agile development environment.
- Debugged, refactored, and optimized existing code to improve readability, performance, and maintainability.
- Collaborated with cross-functional teams using Git-based workflows, sprint planning, and code reviews.

Web Development Intern

Dec '25 — Jan '26

CodSoft

Mumbai, India

- Built and deployed responsive web applications using HTML, CSS, and JavaScript.
- Implemented interactive UI components, including calculators and landing pages.
- Managed version control and deployment workflows using Git and GitHub Pages.

PROJECTS

KrishiSaathi – Farm-to-Market Marketplace Platform [Link](#)

Jul '25 — May '26

- Built a full-stack marketplace platform connecting farmers directly with buyers, eliminating agricultural middlemen for 18,300+ commodity price records.
- Developed an ARIMA-based machine learning model trained on AGMARKNET government mandi price data to forecast commodity prices.
- Engineered a hybrid Firestore and MongoDB persistence architecture with real-time cart synchronization and role-based farmer and buyer dashboards.
- Integrated Google, Facebook, and Apple OAuth with Razorpay payments and 8-language commodity search; reduced bundle size 69% (2.9MB → 900KB) via code splitting.
- Filed for copyright registration with the Indian Copyright Office (Diary No. SW-21662/2026-CO), currently in re-scrutiny.

MedTalk – AI Healthcare Chatbot [Link](#)

Jan '25 — May '25

- Developed a 24/7 multilingual AI chatbot using the Google Gemini API with voice-based interaction (Google Cloud Speech-to-Text/Text-to-Speech) and a secure Flask REST backend for preliminary healthcare guidance.

EDUCATION

Bachelor of Technology in Information Technology, Shree L. R. Tiwari College of Engineering, University of Mumbai (CGPA: 7.41/10) Aug '23 — Aug '26

Mumbai, India

- Relevant Coursework: Data Mining & BI, Statistics and Data Science, AI and Data Science, Wireless Technology, Information Retrieval Systems, Infrastructure Security

SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks and Libraries: React.js, Next.js, Node.js, Express.js, Flask

Databases: MongoDB, Firebase Firestore

Cloud and Deployment: AWS, Google Cloud Platform (GCP), Vercel, Docker

Tools: Git, GitHub, REST APIs, Postman

Machine Learning and Data: Machine Learning, ARIMA Forecasting, Data Visualization, Data Transformation

ACHIEVEMENTS & HACKATHONS

- Smart India Hackathon (SIH) 2025 – MediMitra PS ID: SIH25049
- Built an AI-powered multilingual healthcare assistant with WhatsApp Business API integration and n8n workflow automation, using Gemini and MongoDB, for a national government problem statement.
- Analytix'26 Datathon (24-hr, Thakur College) — analyzed datasets and presented data-driven insights as part of a team
- Edith – AI Agent Buildathon (12-hr) — designed and developed an AI-based agent solution under strict time constraints
- EduNet Foundation Course on Green Skills and AI
