SUMMARY

Final-year B.Tech Information Technology undergraduate specializing in Full-Stack Web Development (React, Next.js, Node.js), Applied Machine Learning, and AI Security. Built a live Farm-to-Market marketplace, KrishiSaathi, using ARIMA for price prediction (copyright registered). Also built PromptShield, an LLM prompt-injection security gateway. Experienced in web development, software engineering, and QA internships, and in Agile.

EXPERIENCE

Software Quality Testing Assurance Intern Aug 2026 – Oct 2026
PRAM Educate IT Software LLP Tanuku, Andhra Pradesh, India

- Conducted exploratory and functional testing on live builds of the PRAM Edu mobile app through manual test execution.
- Found UI/UX defects (button affordance, spacing, language placement), performance issues, and edge cases; reported via WhatsApp AI assistant.
- Completed 150+ hours of hands-on QA training and manual test execution in mobile app quality assurance.

Web Development Intern Dec 2025 – Jan 2026
CodSoft Mumbai, India

- Built and deployed a responsive portfolio (Live), landing page, and CSS Grid calculator app (Live) using HTML, CSS, and JavaScript.
- Managed version control and deployment using Git and GitHub Pages.

Software Development Engineer (Web) Intern Dec 2024 – Jan 2025
Compozent Mumbai, India

- Built React.js UI components, including a Login authentication page and Canva-inspired demo modals (Live).
- Established Git/GitHub standards (commit conventions, feature branches), authored README documentation, and presented code walkthroughs.
- Participated in daily Agile sprint planning, refactoring, and peer code reviews to improve frontend component reusability.

PROJECTS

PromptShield – LLM Prompt Injection Detection & Prevention Gateway (Code) Sep 2026 – Present

- Building a full-stack Next.js 16 / TypeScript security gateway that analyzes each prompt, assigns a 0–100 risk score, and allows, warns, sanitizes, or blocks it before it reaches the LLM.
- Detects prompt injection, jailbreaks, system-prompt leaks, role override, credential probing, and tool abuse using a two-layer defense: client-side pattern guard plus server-side proxy through an OpenAI-compatible gateway.
- Secured the API with Firebase Admin ID-token verification (incl. revocation checks) and server-only credentials; built dashboard modules for secured chat, playground, incidents, analytics, and audit logs.
- Added a configurable policy engine (thresholds; allow/warn/sanitize/block actions), Firestore security rules, incident and audit logging, and a programmatic analysis API; wrote probe and sanitization-verification scripts.

CampusAI – Voice-Enabled College Reception Robot (Final-Year Major Project, IT & EXTC) (Code) Oct 2026 – Present

- Building the Next.js, TypeScript, Tailwind, Framer Motion, and React Three Fiber kiosk interface with a 3D robot and idle/listening/thinking/speaking states for a multilingual (English, Hindi, Marathi, Hinglish) voice assistant.
- Integrating a teammate's FastAPI backend (Groq LLM and Whisper, FAISS RAG, SQLite) through REST chat and voice endpoints.
- Built touchscreen kiosk UI with an audio visualizer, QR route display, and custom hooks for Web Audio recording, WebSocket, and REST clients.

KrishiSaathi – Farm-to-Market Marketplace Platform (Live) (Code) Jul 2025 – May 2026

- Built a full-stack marketplace connecting farmers directly with buyers (18,300+ commodity price records) with an ARIMA model trained on AGMARKNET mandi price data to forecast prices.
- Engineered a hybrid Firestore and MongoDB architecture with real-time cart sync and role-based farmer and buyer dashboards.
- Integrated Google, Facebook, and Apple OAuth, Razorpay payments, and 8-language commodity search; cut bundle size 69% (2.9MB to 900KB) via code splitting.
- Copyright registered with the Copyright Office, Government of India (Certificate No. SW-2026024057; issued 29 Oct 2026).

EDUCATION

Bachelor of Technology in Information Technology (Honors in Data Science), CGPA: 7.41/10 Aug 2023 – Jun 2027
Shree L. R. Tiwari College of Engineering, University of Mumbai Mumbai, India

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS
Databases: MongoDB, Firebase Firestore, MySQL, SQLite
Frameworks and Libraries: React.js, Next.js, Node.js, Express.js, Flask, Tailwind CSS
Cloud and Deployment: AWS, Google Cloud Platform (GCP), Vercel, Docker
Tools and Testing: Git, GitHub, REST APIs, Postman, Functional Testing, Test Case Design
Machine Learning and Security: Machine Learning, scikit-learn, TensorFlow/Keras, ARIMA Forecasting, Gemini API, Prompt Injection Defense

ACHIEVEMENTS & CERTIFICATIONS

- Smart India Hackathon (SIH) 2025 – MediMitra (PS ID: SIH25049): multilingual AI healthcare assistant (WhatsApp API, n8n, Gemini, MongoDB).
- Analytix 2026 Datathon (24-hr, Thakur College), team Edith – AI Agent; Buildathon (12-hr) – AI agent solution.
- Certifications: Pyverse (Python); Intro to Data Science; AI for Students; Intro to Generative AI; EduNet Green Skills & AI.
- Training: Anudip Foundation – MERN Stack Development with AI (ongoing, 133 hrs); Interview Success Programme (6 sessions).
